DynaTech
AFRICA COMPANY LIMITED

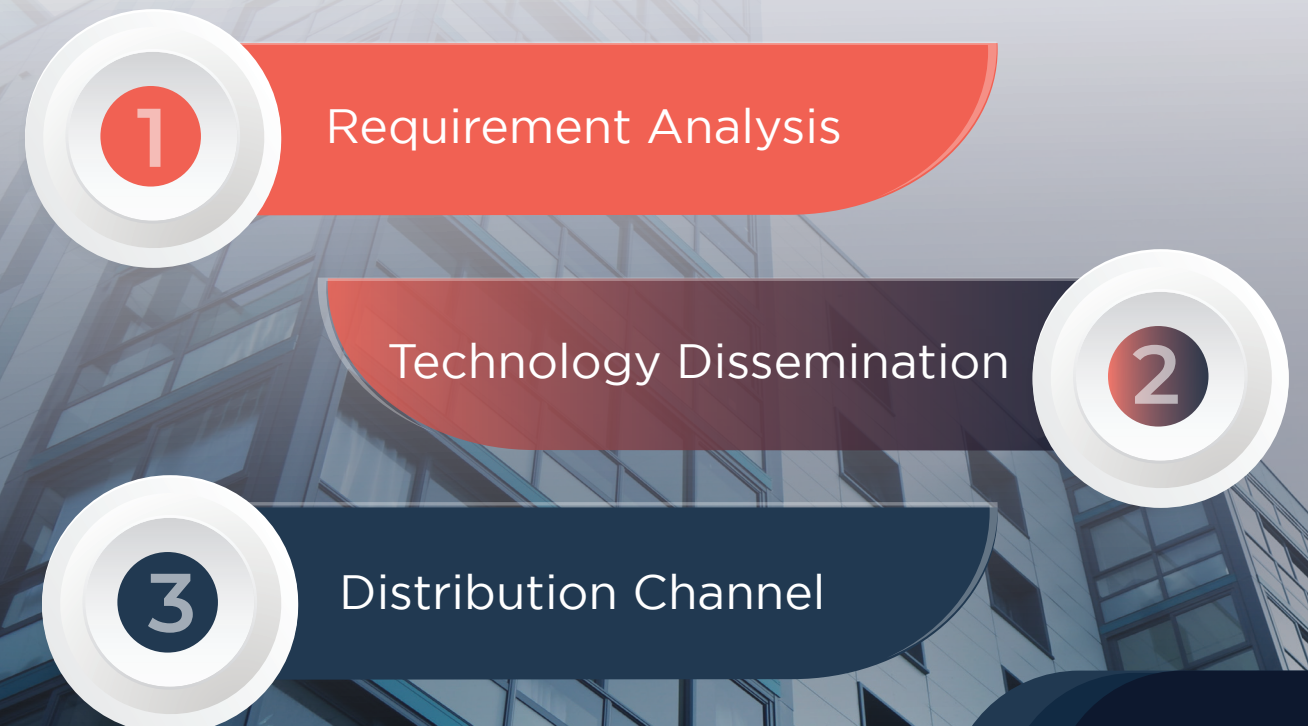

ABOUT US

Distributor of professional electronic systems, including: Security systems, ICT systems, Audio-Visual systems, Fire & Safety systems, Building Management systems, IoT and Home Automation systems and other related high-tech solutions.

When it comes to high-tech, innovative, state-of-the-art and future proof electronic technology solutions, a gap there exists between the end users, system integrators and manufacturers. Inspired by the determination to find a solution to this problem, Dynatech Africa Company Ltd was founded in 2019 to address this very reason: “to bridge the gap”.

As a distributor of professional electronics systems and other high-tech solutions, we aim to work progressively and effectively towards bridging this gap through close engagement with the parties involved in order to deliver excellence and customer satisfaction in the area of professional electronics systems.

Values

- Technology
- Diversity
- Collaboration
- Efficiency
- Dilligence
- Proactivity
- Commitment to Customers

Vision & Mission

To be the most reliable distributor of high-tech products and solutions by exposing clients to the various technologies in the market to enable them to make informed decisions to cater for their growing needs and the changing times.

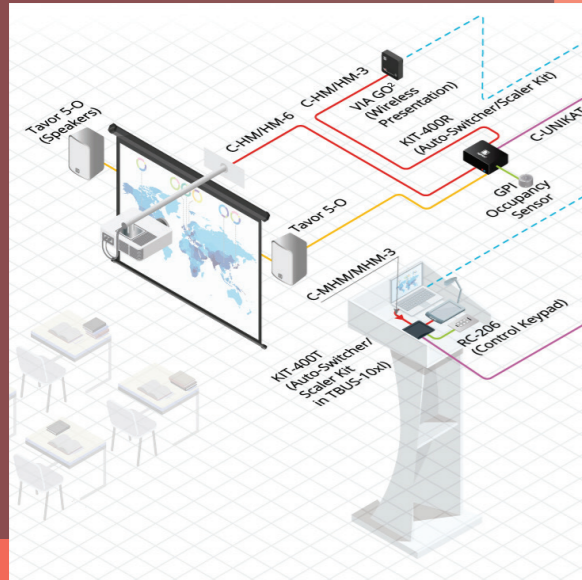

Our core activity being marketing and sales, we dedicate our resources into information and technical knowhow supported/backed by the suppliers and manufacturers. Specifically, as a distribution channel, our role is to gather needs/requirements, assist in design and specications and dissemination of technology solutions. We are here to expose you to different solutions in the market and assist you in making informed decisions when it comes to choosing a product or a system best suited to your current

We partner with several companies to bring you the best products and solutions in high-tech electronic systems.

AUDIO-VISUAL

KRAMER

Kramer is an industry leader in product quality, reliability and customer satisfaction, dedicated to developing creative, reliable & value oriented audio, video & computer signal processing solutions. Their vast array of products allows each customer to find a solution that is perfectly tailored to

their connectivity and functionality needs.

GUARD MANAGEMENT SYSTEM

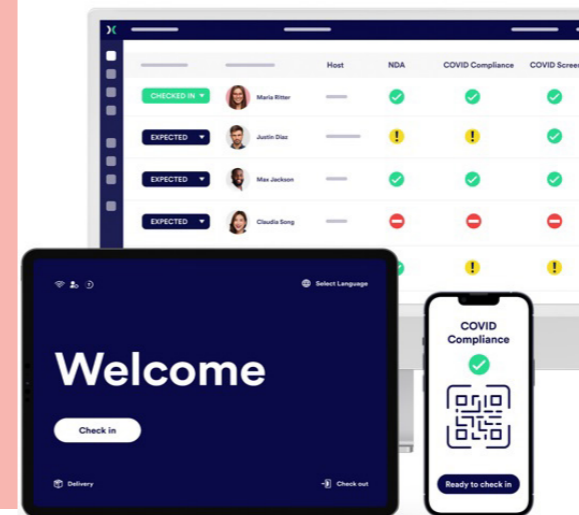

QR - PATROL

QR-Patrol is a real-time online guard tour system designed to solve challenges related to guard monitoring, such as identifying the tours each guard has to accomplish, how their locations will always be tracked, scheduling how often inspection is to be conducted at a check point as well as how incident notifications are to be sent to the monitoring

center. All this is achieved via the use of a simple web interface. Facility managers are then able to analyze data and export multiple reports in real-time.
